NAME \_\_\_\_\_

DATE \_\_\_\_\_

## Scale

Resize an object larger or smaller — hold Shift while dragging a corner handle to scale proportionally.

## Rotate

Turn an object around its reference point — click once to set a custom reference point before dragging.

## Reflect

Flip an object across a horizontal or vertical axis to create a mirror image.

## Shear

Slant an object along an axis while keeping opposite sides parallel.

## Live Corners Widget

Drag the small circle at a rectangle's corner to round it live, non-destructively, without switching tools.

**Practice checklist** — check off each as you complete it:

1. Scale one object proportionally using Shift. \_\_\_\_
2. Rotate an object around a custom reference point (not its center). \_\_\_\_
3. Round a rectangle's corners using the Live Corners widget. \_\_\_\_
