

Suns and Moons Reference

ADD 11.2 · APPLICATIONS OF DIGITAL DESIGN

NAME _____

DATE _____

cyclical animation • loop point • precomposing

A loop doesn't have to be short to feel seamless, and it doesn't feel seamless just because it's short. Every value has to match at the seam.

1. Keyframe the sun's arc across the sky, fading out as the moon fades in.
2. Keyframe the moon's arc, completing the cycle back to the sun's starting position.
3. Check the loop point: does position, opacity, AND scale all match exactly at the seam? _____
4. Precompose the cycle into one nested composition.
