

Label the diagram using the word bank: Application Bar · Artboard · Document Window · Panels · Pasteboard · Properties Panel · Toolbar

1. The **Application Bar** holds the workspace switcher, search, and arrange-documents controls.
2. The **Properties panel**, docked on the right side of the window, is context-sensitive: select the Type tool and it shows font controls; select a shape and it shows fill/stroke controls.
3. The **Toolbar** holds your tools. A small triangle on a tool's icon means it's hiding a flyout group of related tools, click and hold to see them.
4. A floating **Contextual Task Bar** can also appear right next to your selection, offering the same kind of quick, relevant actions.
