

FDD 1.1 | Guided Notes: What is Design?

NAME _____

books • buildings • comp • direction • length • one • problem • products •
rough • solving • thumbnail • ubiquitous • width

1. Graphic design surrounds us: it is the _____ we read, the _____ we buy, and the _____ we inhabit. Design is a _____ art form, we're exposed to thousands of examples of it every single day.
2. Design is not decoration, it is _____. Having design software doesn't automatically make someone good at design.
3. List at least 4 careers in graphic design from the list your teacher shares:

4. One of the hardest things for new designers to accept: design is rarely **representational** (a realistic depiction of a real object), it's usually **abstract** (an idea without a concrete, literal form). An abstract image can be read as more than one thing at once, that's called **ambiguity**, and it's a *feature*, not a mistake.
5. Designers rarely use their first idea. They generate many quick _____ sketches, narrow those down to a few developed _____ sketches, then finish with one polished _____, short for comprehensive design.
6. A line is an identifiable path created by a point moving in space. It is _____-dimensional, and can vary in _____, _____, and _____. Lines can be horizontal, vertical, or diagonal, straight or curved, thick or thin.
