

Refining Paths Quick Reference

FDD 4.4 · DIGITAL COMMUNICATIONS

NAME _____

DATE _____

Simplify

Object > Path > Simplify—reduces anchor points on a messy path while keeping its shape.

Join

Cmd/Ctrl+J—connects two selected open endpoints into one point, or closes an open path.

Shape Builder Tool

Shift+M—drag across overlapping shapes to merge them. Option/Alt-click a region to remove it.

Pathfinder—Unite

Combines all selected shapes into one single shape.

Pathfinder—Minus Front

Subtracts the top shape(s) from the shape behind them.

Offset Path

Object > Path > Offset Path—creates a new outline a set distance inside or outside a shape.

Two-Minute Drill (today's F3): when your teacher says go, take the low-poly facet you're working on and use **one** of the tools above to clean it up. Screenshot the before and after.
