

ADD 2.4 | Guided Notes: Standards, Formats & Frame Rates

NAME _____

codec • H.264 • interlaced • progressive • ProRes

1. _____ scan transmits a frame as two alternating half-frames of lines. _____ scan draws every line of a frame at once — the modern standard.
2. A _____ is software that compresses video for storage and decompresses it again for playback or editing.
3. _____ is a lossy codec used for about 90% of video delivered today. Apple _____ is a lossless, professional codec — larger files, but far better suited to editing and color work.

Clip	Frame Rate	Resolution	Codec
