

GMetrix SMS: Launch the Illustrator Practice Exam

FDD 2.1 · FOUNDATIONS OF DIGITAL DESIGN

NAME _____

DATE _____

PART 1 · LOG IN TO GMETRIX SMS

1. Open **GMetrix SMS** (Applications folder → **GmetrixSMSe**).
2. Click the **Login with Google** button and sign in with your **school Google account**. Don't create a new account.

PART 2 · LAUNCH THE ILLUSTRATOR PRACTICE EXAM

3. In your list of tests, find the **Adobe Certified Professional: Illustrator** practice exam (2025 exam version) and select it.
4. Choose **Testing Mode** (unless your teacher says otherwise), then start the exam. GMetrix opens Illustrator for you.
5. Wait for the GMetrix panel to appear in Illustrator with your first task. Don't click anything while it loads. If it doesn't open properly, use the Troubleshooting steps below.
6. Work the whole exam independently, then submit it. On the results screen, take a screenshot: press ⌘ **Command + Shift + 3** to capture the whole screen. The screenshot saves to your **Desktop**; move it to your Screenshots folder.

TROUBLESHOOTING: THE EXAM DOESN'T OPEN PROPERLY

If Illustrator opens but the GMetrix panel never shows up, or the exam won't start, open Illustrator in **Rosetta** yourself, then try again:

- A. Quit Illustrator completely (⌘ **Command + Q**).
- B. Open the **Creative Cloud** app (Applications folder, or the **Creative Cloud** icon in the menu bar → **Open Creative Cloud**).
- C. Click the **Apps** tab, then **Installed apps**.
- D. Find **Illustrator**, click **⋮ (More actions)** next to its **Open** button, and choose **Open in Rosetta**.
- E. Wait until Illustrator's Home screen appears and leave it open. Then go back to GMetrix SMS and start the exam again (step 4).

OTHER PROBLEMS

PROBLEM	TRY THIS
Can't log in	Use Login with Google and pick your school account, not a personal one.
GMetrix SMS says it can't find Illustrator	Tell your teacher.
Exam looks frozen at the start	Wait a full minute before clicking anything; files load in the background.
