

audio descriptions • captions • color contrast • subtitles • transcript

1. _____ display a video's spoken dialogue AND relevant sound effects, so a viewer can follow along with no audio at all.
2. _____ translate or transcribe dialogue, assuming the viewer can already hear other sound cues — that's the difference from captions.
3. _____ are a narrated track describing key visual information for viewers who are blind or have low vision.
4. Auto-generating a _____ is fast, but always needs a human proofread pass before you trust it.
5. Captions need enough _____ against the footage behind them, or they become unreadable.

Discuss: Your auto-captions spelled your interview subject's name wrong throughout. What's the real-world cost of shipping that without fixing it?
