

NAME _____

DATE _____

Threading Text

Click the red "+" overflow icon, then click another shape to link the two areas—text now flows continuously between them.

Wrapping Text

Object > Text Wrap > Make—forces type to flow around another object's contour instead of running behind it.

Character & Paragraph Styles

Save a formatting combination once, apply it everywhere, update every instance at once by editing the style.

Create Outlines

Type > Create Outlines (Shift+Cmd/Ctrl+O)—converts live text into vector paths. No longer editable as text.

Fix-This-File task: the provided file has a text area showing the red overflow icon and un-outlined logo text. Fix the overflow by threading to the empty shape provided, then convert only the logo text to outlines.
