

Geometric Logo — Design Brief

FDD 2.3 · FOUNDATIONS OF DIGITAL
DESIGN

NAME _____

DATE _____

Define the Problem. Fill this out before any sketching happens. A brief written after the design is just a description, not a brief.

CLIENT	You — this is your own portfolio brand
TARGET CONSUMER	
OPPORTUNITY STATEMENT	Your Google Sites portfolio has a logo slot and a favicon slot, both currently empty. A visitor's first impression of your work starts before they see a single project.
DESIGN STATEMENT	
CRITERIA	The mark must: read clearly at 48×48px (favicon size) · combine with your site name into a wide header lockup (max 225×40px display) · be built entirely from geometric shapes, no freehand paths
CONSTRAINTS	Vector only (Illustrator, not a raster/photo-based mark) · one document, two artboards, both correctly named · delivered by S2
DELIVERABLES	One .ai file, 2 artboards (Header Logo + Favicon) · PNG exports of each, with alt text written for both

Research and Learn: in your own words, why does a favicon (48px, tiny) need a different design approach than a full header logo (wide, more room)?
