

Type on a Path & Special Type

NAME _____

DATE _____

Type Object	How it behaves	Best for
Point Type	Grows horizontally forever unless you add a line break.	Headlines, short labels.
Area Type	Wraps automatically inside a closed shape.	Paragraphs, body copy.
Type on a Path	Flows along an open or closed path's contour.	Badges, logos, curved headlines.

SKETCH: A BADGE OR LOGO IDEA USING TYPE ON A PATH

1. A specific visual variant of a character (like a stylistic alternate or ligature) is called a _____.
2. Dummy text used to preview a layout before real copy is written is called _____ text.

Discuss: Why might a designer choose Type on a Path for a badge logo instead of just rotating point type by hand?
